

Fuencaliente de La Palma

Zamora Beach

English edition

Updated on 7 September 2026

La Zamora beach is one of the most popular in the municipality of Fuencaliente de La Palma and one of the best known on the island. It lies on the western strip, to the south-west, and is reached by the Las Indias road. It is sheltered under a cliff and protected where it opens to the sea by a striking group of sea rocks.

It has black sand along its entire length and measures roughly 150 m long and 15 m wide, divided into two stretches: the one known as Playa Chica has a special charm, while La Zamora Grande offers a wider setting whose shore melts into the crystal-clear waters.
